

VINCENT “Vee” DOCUMENTATION

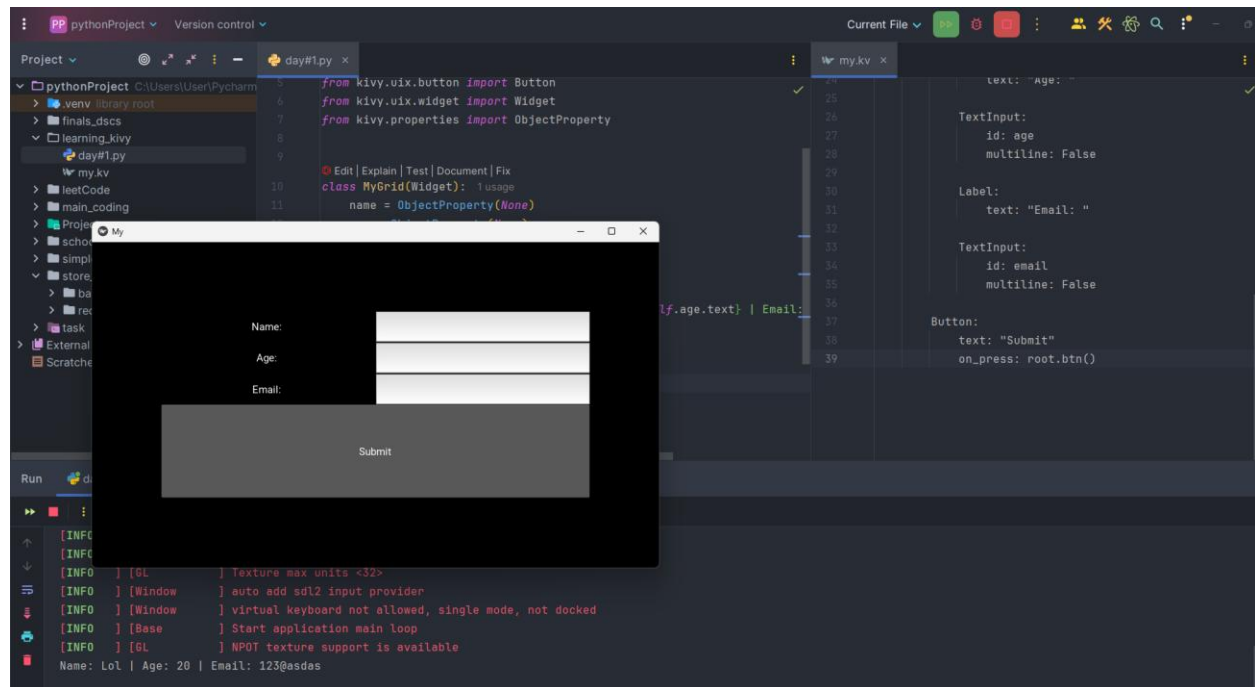

Day 2, Understanding the kv language or the KIVY language to separate the design and logic of the code

Playing with the kv file.

VINCENT “Vee” DOCUMENTATION

tried to connect a button inside the kv file, it was fun learning that it was easy

VINCENT “Vee” DOCUMENTATION

[SOURCES CODE]:

```
<MyGrid>

name: name
age: age
email: email

GridLayout:
  cols: 1
  size: root.width-200, root.height - 200
  pos: 100,100

  GridLayout:

    cols: 2

    Label:
      text: "Name: "

    TextInput:
      id: name
      multiline: False

    Label:
      text: "Age: "

    TextInput:
      id: age
      multiline: False

    Label:
      text: "Email: "

    TextInput:
      id: email
      multiline: False

    Button:
      text: "Submit"
      on_press: root.btn()
```

and the main file is the same as is
